

A GUIDE TO YOUR STATEMENTS

Your quarterly statements from LPL Financial are designed to provide a clear, comprehensive view of your investments.

Inside each statement, you'll find:

- A summary of key information is presented first on statements.
- Total values and important changes are highlighted up-front, followed by supporting details.
- Charts and graphs help you understand your information at a glance.
- Explanations and disclosures are written in plain, understandable language.
- If you have questions, your financial professional's phone number and contact information are on the very first page.

In addition to your quarterly statement, LPL provides a comprehensive yearly statement—and generates a simplified statement in any month when there is qualifying activity in the account.

One more reason to work with a financial services professional backed by the resources of LPL Financial. With us, your needs always come first.

¹ Market Fluctuation reflects the impact of changes in the value of securities held in your LPL Financial account, as well as the impact of any transfers of securities into or out of your account during the statement period.

² Your account is closed. If you are still showing a balance, please contact your advisor to resolve.

The Consolidated Portfolio Summary provides a high-level view of all your LPL Financial accounts.

If you have more than one LPL Financial account, but receive separate statements, you won't see this summary. Ask your financial professional to set up a combined group statement for your accounts.

1 Your Portfolio Provides a clear picture of the most important information. Two time ranges compared side by side for more transparent and in-depth account understanding.

NEW! Revised Portfolio Summary: A shorter, more concise summary on the first page of your statement can help you quickly focus on account value and high-level changes. Net Investment Returns combines dividends, interest, capital gains, other distributions, fees/expenses and market fluctuations. Those details can still be found in the Cash Activity Summary that appears later in the statement. Non-Cash Transfers and Journals are now included in the Inflows and Outflows line items.

2 Your Accounts View important account information consolidated for the entire household portfolio.

3 Asset Allocation Summarizes the portfolio's asset allocation in list and graphical donut chart format. See the updated list of asset allocations below.

The first page of an account statement gives you a high-level view of your account and any changes in value that have occurred during the period. The format of the account-level summary is similar to that of the Consolidated Portfolio Summary, so they are easy to reconcile.

The following pages—Account Holdings and Account Activity—supply the details behind the numbers found in your account summary.

1 Investment Objective Displays the investment objective for the account in a graphical format.

2 Account Summary Shows activity information for the investment accounts year-to-date and current quarter.

NEW! Revised Account Summary: A shorter, more concise summary on the first page of your statement can help you quickly focus on account value and high-level changes. Net Investment Returns combines dividends, interest, capital gains, other distributions, fees/expenses and market fluctuations. Those details can still be found in the Cash Activity Summary that appears later in the statement. Non-Cash Transfers and Journals are now included in the Inflows and Outflows line items.

3 Gain/Loss Summary Summarizes the realized and unrealized gains and losses for non-retirement accounts. For retirement accounts, a Retirement Summary appears here (example on number 5).

4 Asset Allocation Summarizes the account's asset allocation in list and graphical pie chart format.

5 Retirement Summary Summarizes the activity for the retirement accounts.

The example provided is merely an illustration and does not represent an actual statement or account.

Your account holdings are grouped by investment type, and the value of each security on the last day of the month is displayed. The investment types correspond to those shown in the investment allocation and pie chart in your account-level summary.

1 **Cash & Cash Equivalents** Displays excess cash swept into a money market fund, insured cash account, or deposit cash account. The banks holding your insured cash account are also shown, along with dividend/interest paid, and an interest and dividend rate.

2 **Equities & Options** Displays total market value for your equities and options, along with your estimated annual income.

3 **Exchange-Traded Products, Mutual Funds, Exchange-Traded Funds, Closed-End Funds, and Interval Funds** Displays totals for each asset type, providing a clear view of your investment mix.

Additional sections may appear as part of the account holdings summary, such as Alternative Investments, Annuities, Certificates of Deposit, Municipal Bonds, etc.
